**The Speakership.**  
Correspondence of the News.

Permit me through your columns to suggest Edmund Jones, Esq., of Caldwell, for the Speakership of the House of Representatives. Mr. Jones has served two terms in the Legislature, having been first elected a member of the House in 1870, and again in 1872, and is now its Chairman.

During these terms he was more frequently called upon to act as temporary Speaker, than any other member of the House, and his knowledge, on those occasions, he always presided with signal ability. His dignified, but courteous bearing, his quickness of perception and intimate acquaintance with parliamentary law, eminently qualify him for the position.

**Use of the Army Under the Posse Act.**  
N. Y. Times.

WASHINGTON, Oct. 3.—The Adjutant General of the Army will, in a few days, issue an order further explaining the posse comitatus clause in the Army bill. It will state that officers can detail the troops under their command to protect United States property whenever it is in jeopardy, or there is any danger of its destruction. Another case in which troops can be used that will be cited will be for the purpose of visiting with hostile intent any foreign country, and in arresting the leaders of such expeditions.

It will be remembered that the use of troops in such cases was made the subject of Cabinet consideration a few days since.

**The Day of Atonement.**  
The Hebrew population observed yesterday the greatest of their holidays, "Yom Kippur," or the day of atonement. The observance was general, work of any kind being carefully abstained from and the stores of the people of the faith all closed. This most popular festival of the Jewish people began at sunset on Sunday, and continued until the same hour last evening. The origin and institution of the festival is to be found in Leviticus xvi: "And it shall be unto you a statute forever; in the seventh month, on the tenth day of the month, you shall afflict your souls and do no work at all."

At sunset the twenty-four hours' fast and continued prayer commenced, the services consisting chiefly of confessions of sin and utter unworthiness, and the Israelite imploring divine mercy for pardon. It is customary in the evening for parents to bestow their benediction on their children. Whosoever they meet on the day, they previously acquainted with the complete strangers are commanded to salute each other with brotherly love and sincerity. If any animosity or quarrel existed between two Hebrews, it is obligatory on them to become reconciled. He who is conscious of having wronged his neighbor, is bound to offer reparation. The law which ordains the observance of

**Department of Agriculture.**

The crop report from this department for September is not so good as we found much that is interesting in the way of statistics. Speaking of the establishment of the fertilizer control station at Chapel Hill, the report says:

No one item involved such hazardous questions as our farmers' commercial fertilizers. But it is no longer so; for, by excluding spurious goods from our market, and requiring an analysis and an exposition of the chemical composition of fertilizers offered to our farmers, they could be intelligently of their comparative merit.

We must not stop there. We must supply to our farmers such information as will enable them to substitute a manure of equal merit, if practicable, at less cost. At all events, we must of manures that will give a better profit to the farmer on the amount invested in them. We announce the completion of arrangements to have analyzed also any chemicals that may be used in the manipulation of artificial manures.

Farmers are largely increasing the use of chemicals, and are more liable to be defrauded and imposed upon in these than in the manufactured fertilizer, and I urge them to avail themselves of the protection afforded by the Analytical Station, and have samples of chemicals analyzed which they purchase.

**The Connecticut Mutual Life.**

In another column appears the advertisement of this grand old Insurance company, now in the 33d year of a prosperous existence. During all that lapse of years the career of the company has been one of unbroken success, and time has but added to its solidity and the confidence with which it is regarded by the public. Of such a corporation unquestionable as to solidity, incomparable as to management, but few words are necessary, where one can but speak in highest commendation. The record of the company in this State has been enviable, every loss having been paid without question, and every transaction having ever been conducted on the highest plane of honesty and fair-dealing. That clever gentleman, S. D. Wait, Esq., the efficient General Agent, is commended to the people of the State, as worthy their every confidence.

**The Bingham School.**

This magnificent institution, which by reason of the thoroughness of the education it gives, as well as the deportment of its pupils, has now a reputation second to none, is now more flourishing than at any previous period in its long history of success. There are now on the rolls 106 cadets present for duty. The forthcoming catalogue will contain the names of 140 pupils. The success of this fine school, so much esteemed by the people of the State and South, proves a source of gratification. The cadet battalion will make by far the best display they have ever made at the Fair. They will occupy quarters on Fayetteville street, and will show what perfect discipline can do.

Ten years ago the great organized Democratic party was in the minority. Since then it has had a brilliant series of successes. And just as this same great party is about to reach forth her hand to receive the prize for which she has struggled, it is possible for any set of men who have helped her to fight the great battles—to disintegrate her, and foil her? Men are not yet ready to tear down this party which has saved the country from ruin. We do not believe there is a more ardent supporter in the land.—*Dahlonega Signal.*
